

SERVICE 3 – RESERVATION

NOW AVAILABLE

Truckstops can now subscribe to the reservation service of Truckinform. Dispatchers and truck drivers can then pre-book parking spaces hours or days in advance — via the internet and (soon) on board computers. Drivers can confidently know that they have parking when their work-time is finished.

Truckinform is one single platform containing a unified, detailed, and up-to-date inventory of European truck areas. It comprises the following three services:

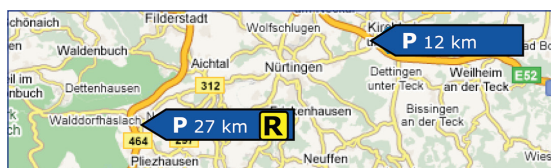

1. **Information** about 2'800 truck parking areas in 40 European countries
2. **Availability/guidance**, where users will be directed to the next available and appropriate truck parking place
3. **Reservation**, where it becomes possible to book a truck parking space in advance.

USER-FRIENDLY, MULTI-PLATFORM, TRANS-EUROPEAN

DRIVERS/DISPATCHERS

it is very easy to book a parking

1. register on www.truckinform.eu (for free!)
2. search for bookable truck parking area (marked with **R**)
3. enter arrival and departure time — done!

TRUCKSTOP OPERATORS

sign in for Truckinform, Service 3

1. You can offer an additional service, relevant to many
2. You are able to receive bookings from drivers and dispatchers from all over Europe, and drivers might choose your truckstop specifically because he/she was able to reserve
3. You can choose from two methods of handling reservations on your site
 - a) by handling access control manually (like a daily reservation list forwarded to your e-mail address)
 - b) by connecting your parking management system (gate, barrier)
